

## Nessy Fingers

Nessy Fingers is a typing tutor with a difference.

The first thing you notice about Nessy Fingers is how different learning to type is from other typing programs. Nessy Fingers uses the alphabet to teach keyboard skills unlike other typing tutors that start with the 'home row'.

In five short lessons you will learn the alphabet. To improve your typing skills there are several exciting games available which use curriculum word lists to practise with. To encourage typing there is a 'Hall of Fame' where you can win trophies as a reward for accurate typing.

To make learning more interesting there is a range of music and noises available for the different games. The settings menu allows different colour styles for the text bar and there is a timer available for the games.

There are extensive word lists and sentences available and you can even add your own.

Nessy Fingers teaches the 3 skills needed to touch type:

1. Memorise key positions – lessons encourage correct finger placement and posture
2. Accuracy – Perfect Typing unlocks secret rewards
3. Speed – Practice develops speed. Motivate practice with 9 great games and 21 trophies.

## Features of Nessy Fingers:

- 5 short lessons
- Keys are learnt in the sequence of the alphabet
- Stickers provided to cover the keys
- Results sets the recommended "Skillometer" level for all games
- Includes 233 word lists which become progressively harder to improve both spelling and punctuation
- Using the alphabet provides a logical and familiar learning structure and reinforces the alphabet sequence, vital for using an index or dictionary
- Game based approach to goal setting
- 9 levels of difficulty range from 4 to 30 words per minute
- Special feature allows you to listen to your own music as you play games.

## Benefits:

- Type safely - Limber your fingers when the 'Take a Break' button appears
- Improve presentation - Especially helpful for those with slow or untidy handwriting
- Boost confidence - Develops the ability to work independently
- Speed up - Complete homework more quickly
- Concentrate for longer - Engaging lessons and games focus attention
- All abilities succeed - A multisensory learning environment designed by specialist teachers.

## You will need:

- Windows XP, Vista or 7 / MAC OSX 10.3 or higher
- Processor 1.6Ghz speed (2.0Ghz for Vista and 7)
- 512MB memory (1024 MB for Vista and 7)
- 32 MB video/graphics card
- 100 MB available Hard Disk Space
- Separate sound card, speakers or headphones.
